Day 16: Misleading chart pack

Each page has one chart and a sentence saying where it appeared. All eight are made up, but every trick in them shows up in real reports, news and slide decks.

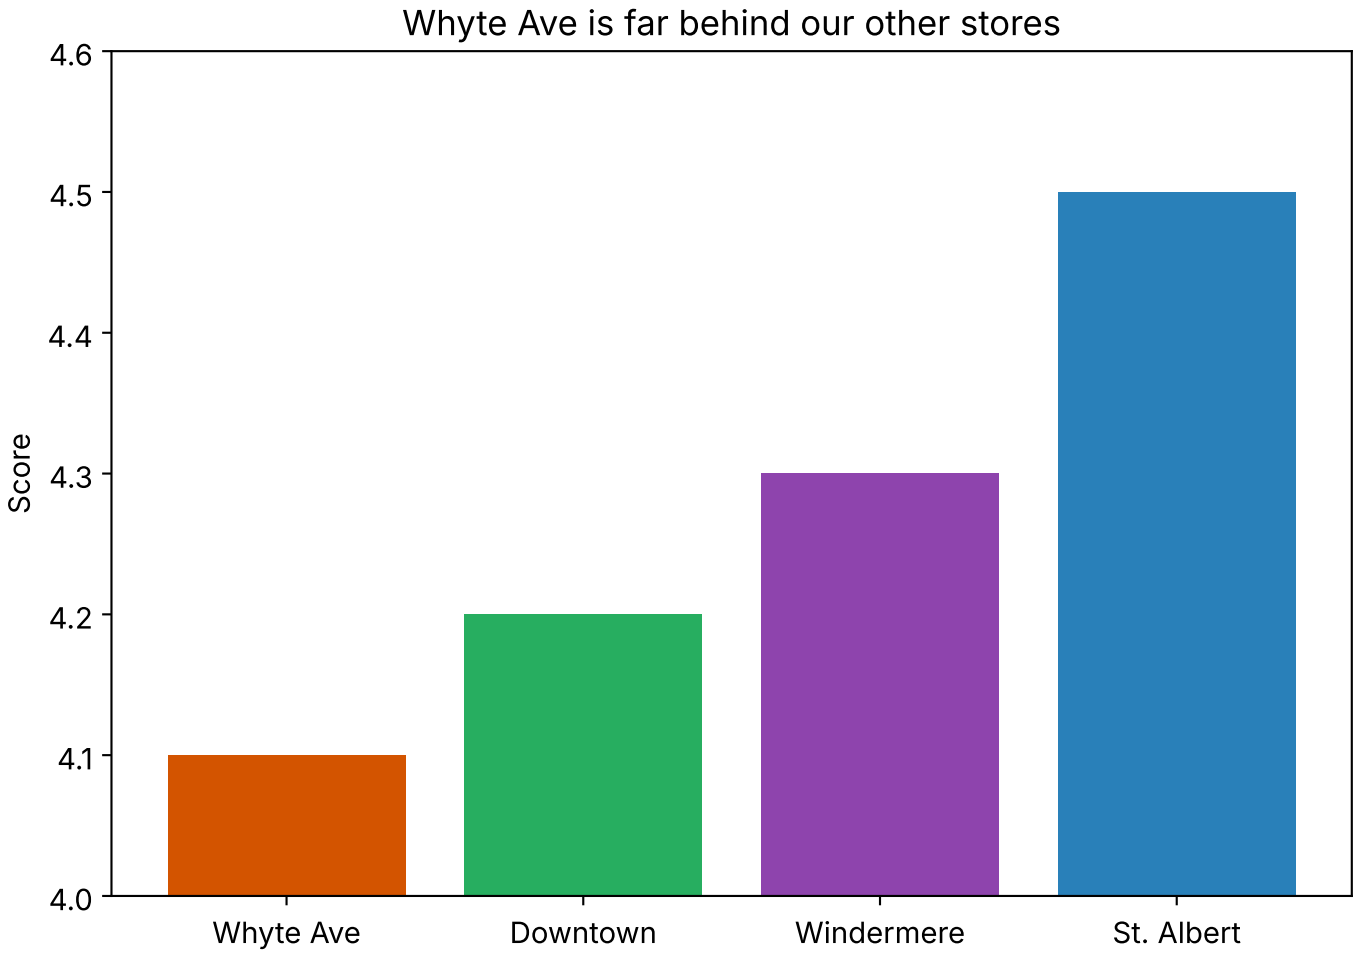
For your chart, answer the three questions on the page:

1. What's wrong with this chart? Name at least two problems.
2. What impression does it create, and is that impression true?
3. How could it be improved? Describe or sketch a better chart.

When you suggest an improvement, be specific: which chart type, what the axes show and where they start, what the title says, and what you'd label. If you have time, redraw it in Python. The numbers you need are readable off each chart.

Chart 1

From a regional manager's slide deck arguing that the Whyte Ave location of Northbean Coffee (four Edmonton-area stores) should close.



1. What's wrong with this chart? Name at least two problems.

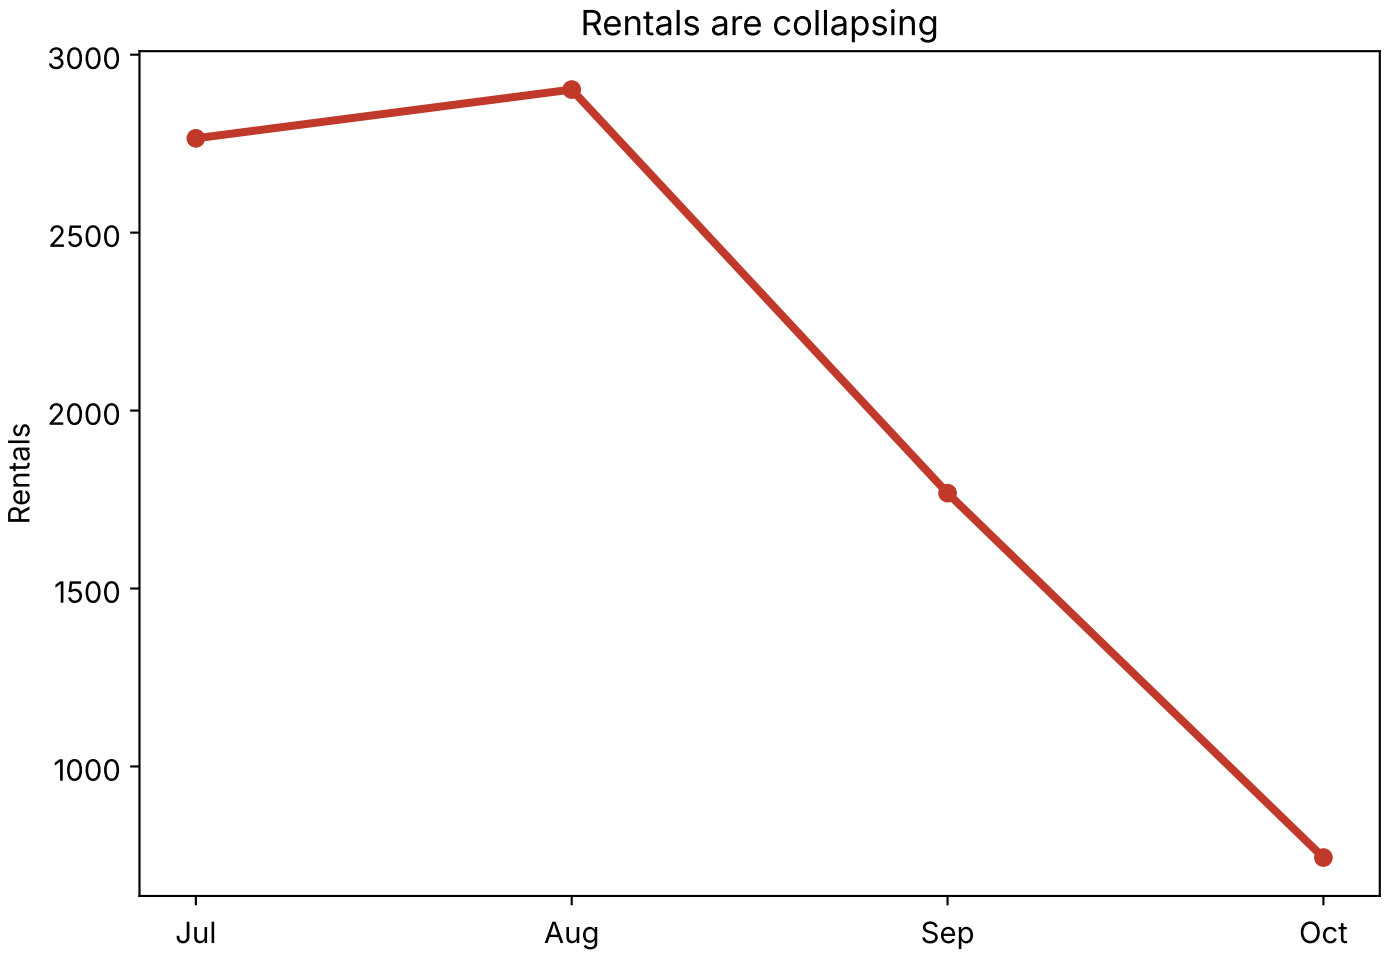
2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Fictional data for teaching.

Chart 2

From a River Valley Bike Rentals investor update, sent in late October 2026.



1. What's wrong with this chart? Name at least two problems.

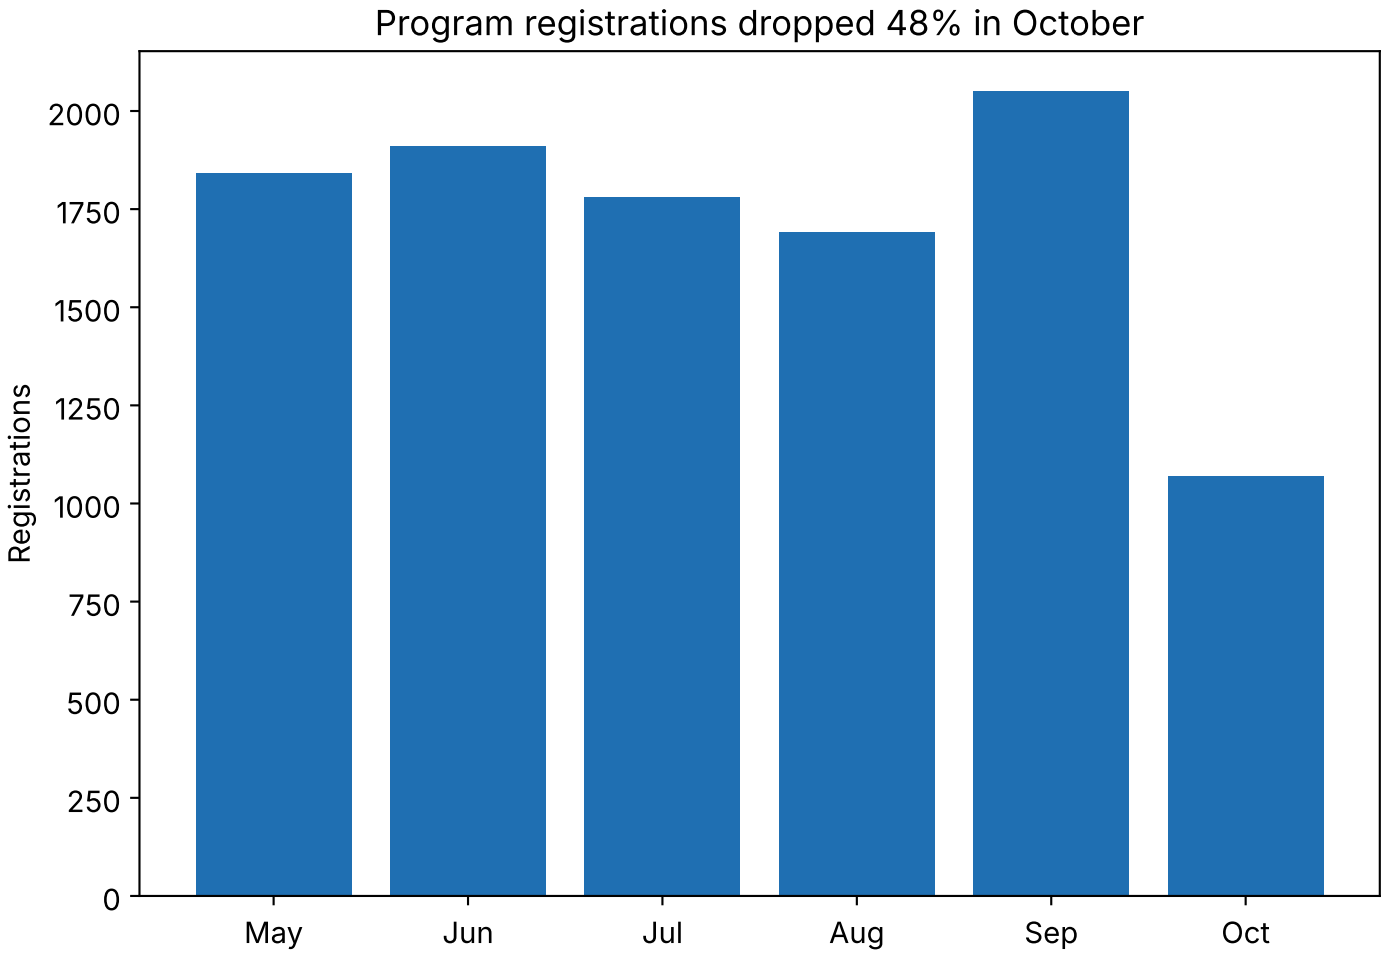
2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Fictional data for teaching.

Chart 3

From a city recreation dashboard. The data was pulled on 15 October 2026.



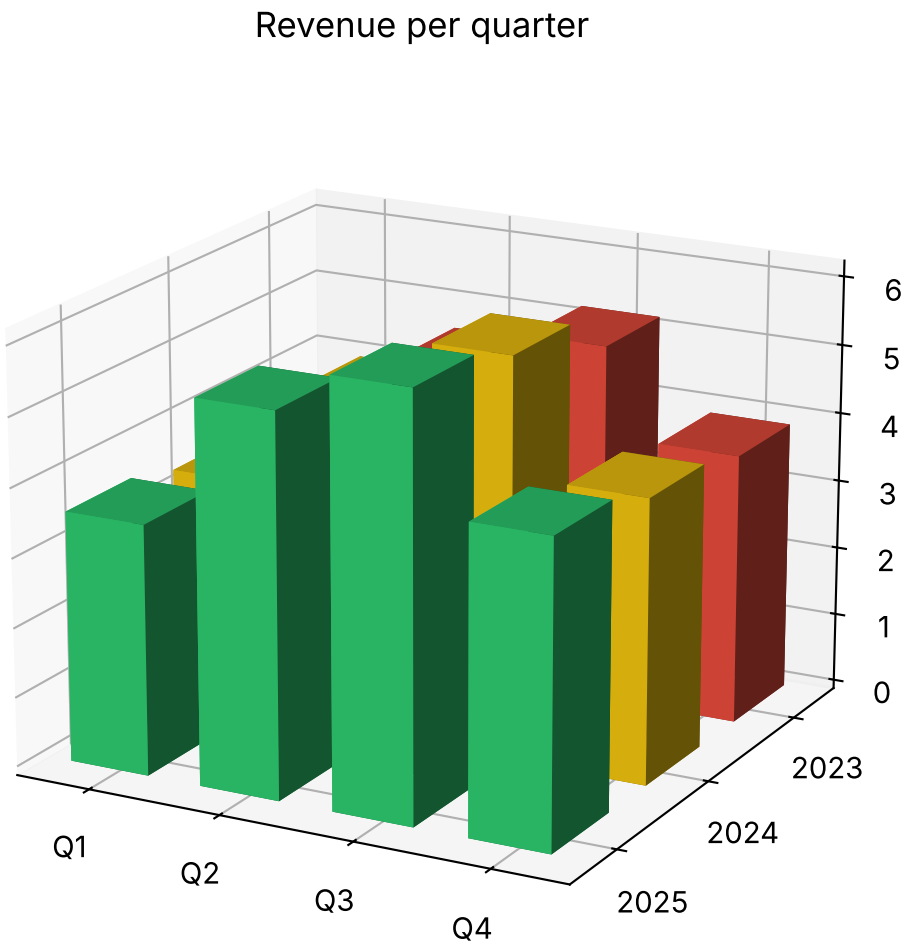
1. What's wrong with this chart? Name at least two problems.

2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Chart 4

From the annual report of an Edmonton event-ticketing company.



1. What's wrong with this chart? Name at least two problems.

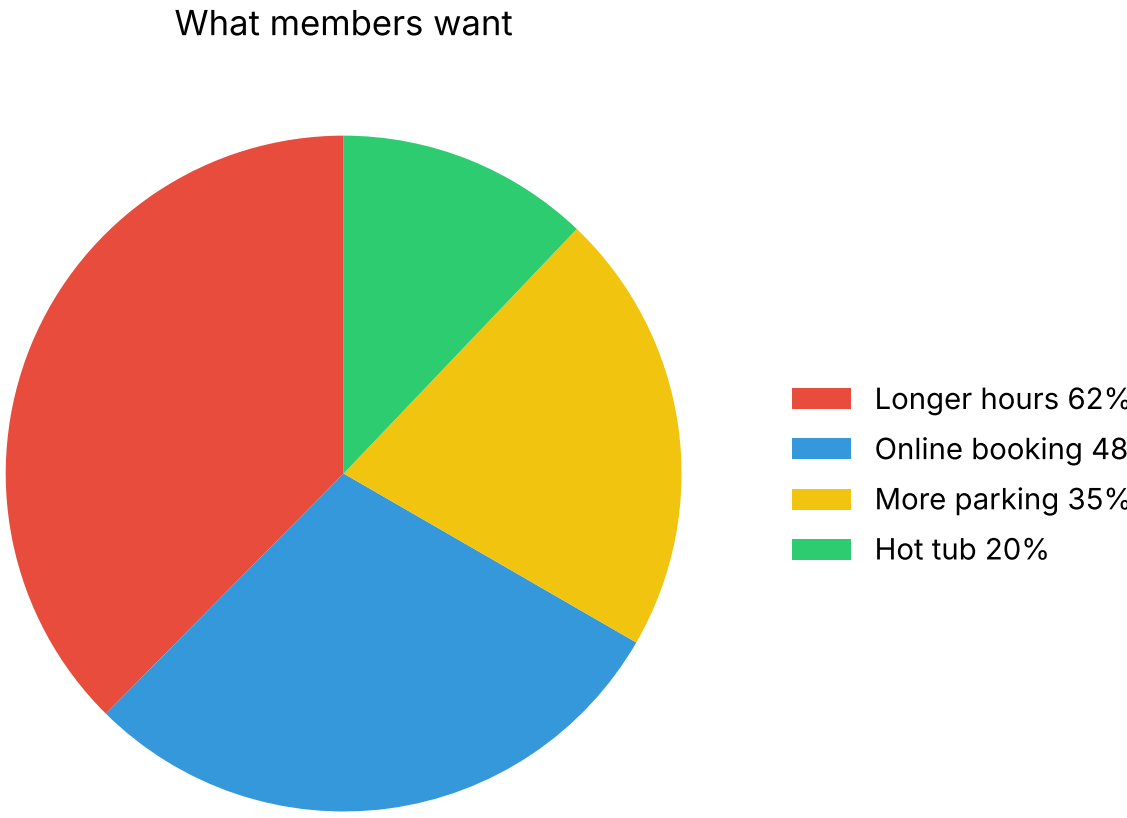
2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Fictional data for teaching.

Chart 5

From a survey summary for a rec-centre board. Members were asked "Which of these would you like us to add? Choose all that apply."



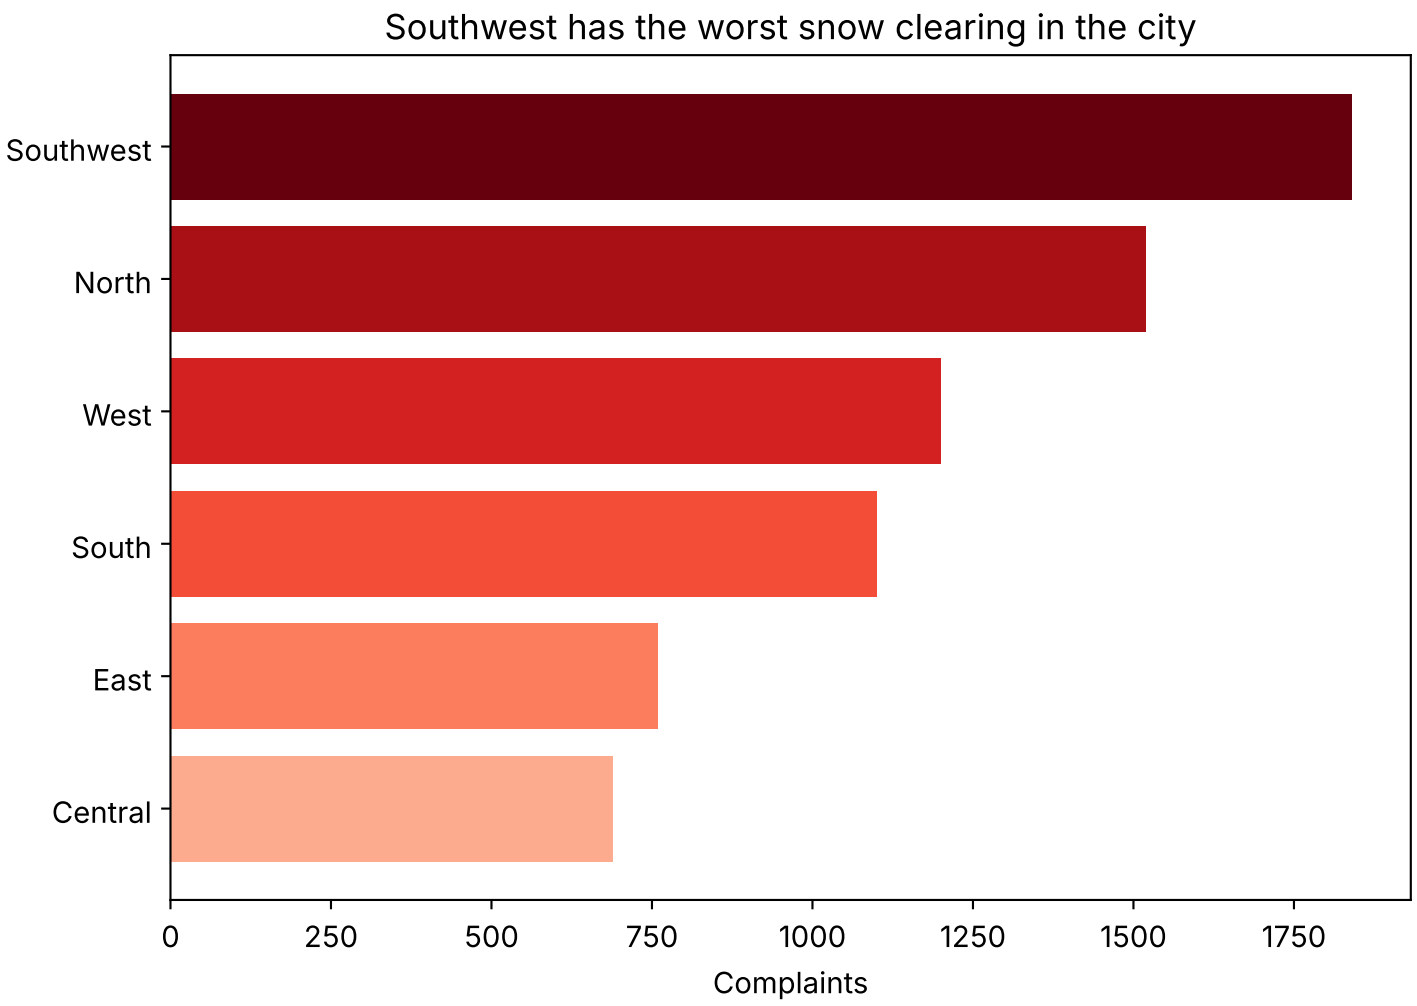
1. What's wrong with this chart? Name at least two problems.

2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Chart 6

From a local news story on snow clearing, winter 2025-26.



1. What's wrong with this chart? Name at least two problems.

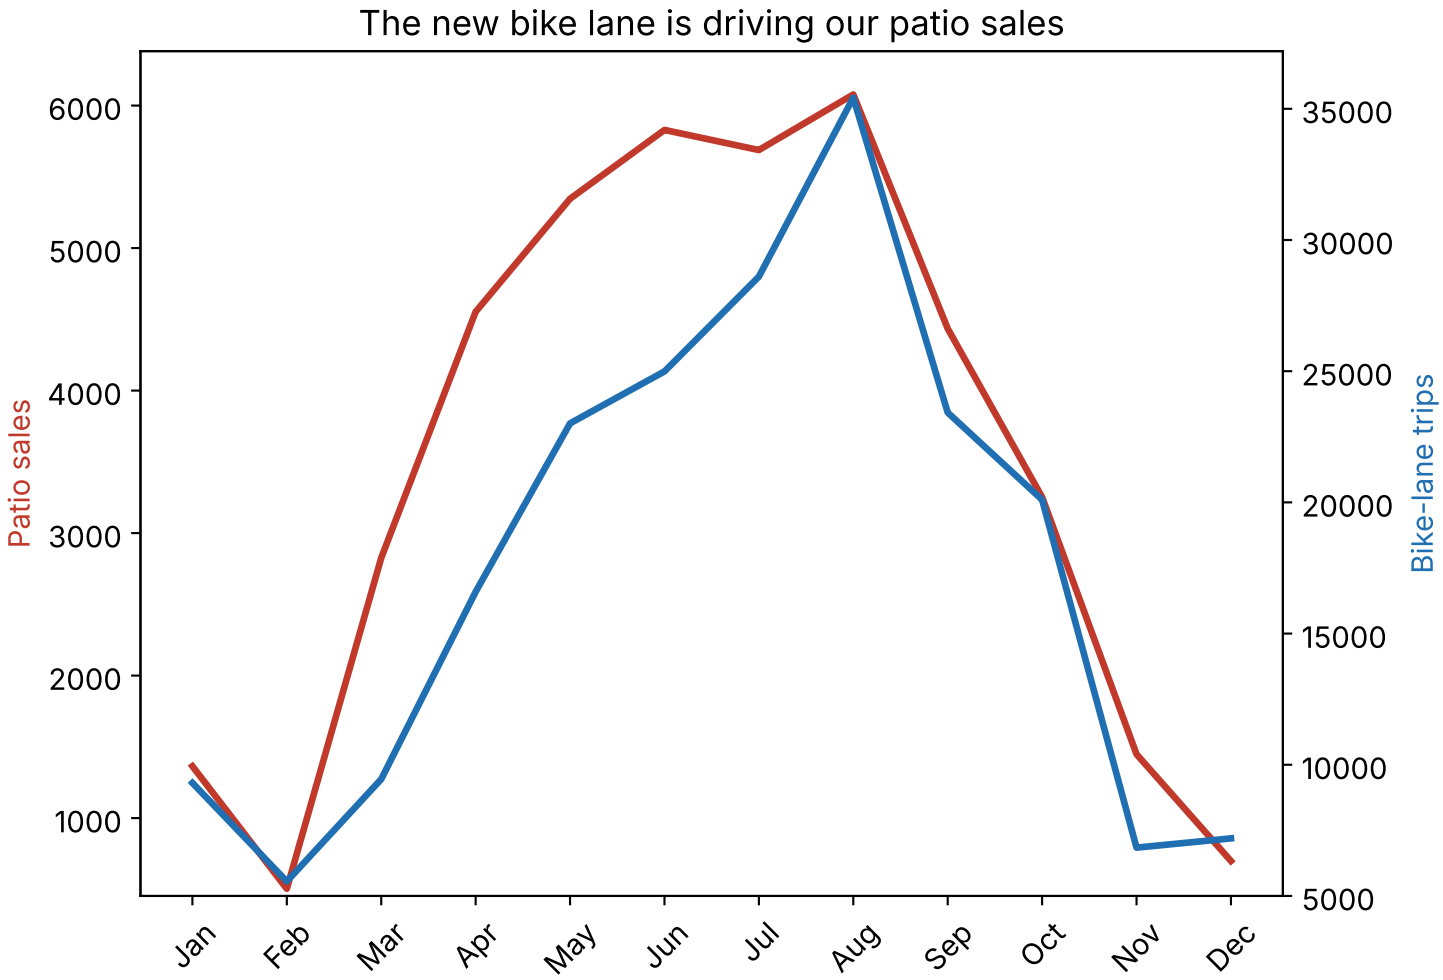
2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Fictional data for teaching.

Chart 7

From a Whyte Ave pub owner's letter to the business association, 2025 data.



1. What's wrong with this chart? Name at least two problems.

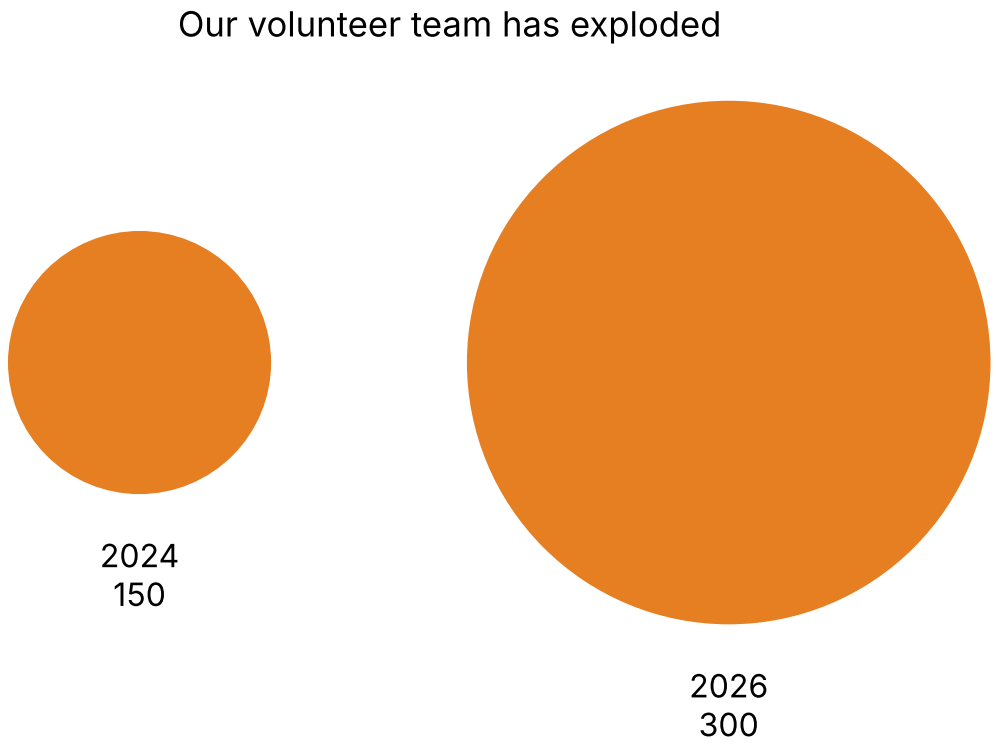
2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Fictional data for teaching.

Chart 8

From a food bank's fundraising flyer.



1. What's wrong with this chart? Name at least two problems.

2. What impression does it create, and is that impression true?

3. How could it be improved? Describe or sketch a better chart.

Fictional data for teaching.
